

FERRI®

SKI DX

SKI DX-SX

GROUP A

Equipped with:

Patented hydraulic device permitting the outer arm to be lifted in order to overcome possible posts, trees, obstacles.

With such a system it is not necessary to slow down the working speed or stop the machine in case of overcoming obstacles. When lifted the outer blade will automatically stop while the inner one will keep on working

Self-levelling mowing disk system

55 cm hydraulic side shift
On/Off electric control

STRADDLE MOWER FOR TRACTORS EQUIPPED WITH FRONT HYDRAULICS AND FRONT P.T.O.

Technical data

Model	Useful width of cut m	Weight Kg	Oil l	Blades speed Rpm	Pto MAX Rpm
SKI	1,20	1050	165	2.850	1.000 (540 option)

HP Tractor		90	100	110	Min. tractor weight Kg	Min. tractor width m
SKI					3200	2,20

SKI DX/SX (Right - Left)

This model is characterised by a structure with a central pin around which the entire mowing equipment rotates.

This rotation permits movement in both right and left advance direction.

Patented system
